

ST CHARLES'
CATHOLIC PRIMARY SCHOOL

Headteacher – Mrs L Nealings

6 March 2023

Dear Families

In our science lessons next half-term, we will be focusing on human biology and getting to grips with how our circulatory system works.

To explore our topic as 'real' scientists, we would like to carry out a dissection on an animal heart, specifically sheep hearts. I will be demonstrating the dissection, following Health and Safety rules closely, and then the children will work in groups to carry out a dissection.

If you have any concerns or questions about your child taking part, please let me know.

Yours sincerely

Miss Thomas
